

OPEN RESEARCH OPPORTUNITIES

Open research *opportunities.*

Expressions of interest are welcome from postdoctoral researchers, doctoral candidates, and visiting scholars working in analysis, differential equations, and dynamical systems.

Important: Opportunity availability, funding, eligibility, and deadlines vary. Confirm current details with the group before preparing a formal application.

OPPORTUNITIES ACROSS CAREER STAGES

01 / POSTDOCTORAL

Postdoctoral fellows

For early-career researchers ready to develop an independent project within the group's analytical and dynamical-systems strengths.

02 / DOCTORAL

PhD researchers

For candidates seeking rigorous doctoral training, close supervision, seminar participation, and a strong research community.

03 / VISITING

Visiting scholars

For short or extended academic visits built around a concrete collaboration, seminar contribution, or joint research problem.

RESEARCH AREAS

- Analysis and nonlinear partial differential equations
- Fluid mechanics, waves, interfaces, and transport
- Hamiltonian dynamics and celestial mechanics
- Symplectic geometry and related mathematical theories

PREPARE WITH PURPOSE

Who should apply and what to prepare

A concise, research-led enquiry is the best starting point. The notes below describe the usual profile and material set; exact requirements may differ by opportunity.

ELIGIBILITY

POSTDOCTORAL

Research independence

A completed or near-completed PhD in a relevant mathematical field, with evidence of research quality and a clear project direction.

DOCTORAL

Strong foundations

A relevant master's degree or equivalent preparation, solid analysis background, and readiness for sustained theoretical research.

VISITING

A shared research plan

An academic affiliation and a concrete collaboration proposal aligned with a current DLADE member or research activity.

APPLICATION MATERIALS

01

Curriculum vitae

Education, appointments, research experience, and current affiliation.

02

Research statement

A focused account of past work and the questions you want to pursue at DLADE.

03

Publication record

A publication list or thesis summary appropriate to your career stage.

04

Selected work

Up to three representative papers, preprints, or a substantial writing sample.

05

References

Names and contact details for academic referees; letters may be requested later.

06

Practical details

Preferred start date, intended visit length, and any known funding constraints.

FOR INTERNATIONAL APPLICANTS

Practical support from enquiry to arrival

The group can help prospective international researchers identify the relevant university route and understand the sequence of academic review, formal application, and pre-arrival steps. Typical guidance may cover:

- Academic fit and host identification
- Document and translation requirements
- University admission or appointment procedures
- Visa, insurance, housing, and arrival information

Support is guidance, not a guarantee of admission, appointment, funding, or visa approval.

FROM ENQUIRY TO DECISION

A clear application pathway

Begin with research fit. Formal procedures follow only after the relevant host and opportunity have been identified.

APPLICATION PROCESS

1

Review the group

Identify the research direction and member most closely aligned with your work.

2

Send a focused enquiry

Introduce your background, project idea, timing, and the opportunity type you seek.

3

Discuss academic fit

If there is mutual interest, refine the project scope and confirm the correct route.

4

Submit formally

Follow the current university, school, fellowship, or funding instructions exactly.

5

Plan the next steps

After a decision, complete appointment or admission, funding, and arrival procedures.

CONFIRM BEFORE APPLYING

AVAILABILITY

Is the route open?

Ask whether the relevant position or visit route is currently accepting expressions of interest.

FUNDING

What is covered?

Confirm the source, duration, eligibility rules, stipend or salary basis, and any matching requirements.

TIMING

Which deadline applies?

Internal review, university procedures, and external funding calls may have different timelines.

READY TO EXPLORE A RESEARCH FIT?

Start with the current website.

Find current people, research directions, activities, and opportunity notices. Use the contact details shown there for the relevant group member or opportunity.
